Leading Safeguarding in Education PG Cert

The Designated Safeguarding Lead (DSL) role is integral to schools and colleges meeting their legal and statutory obligations related to child safety and welfare.

Whilst the role and its responsibilities are outlined in Keeping Children Safe in Education (KCSiE), there is very little in the way of 'how' to do it.

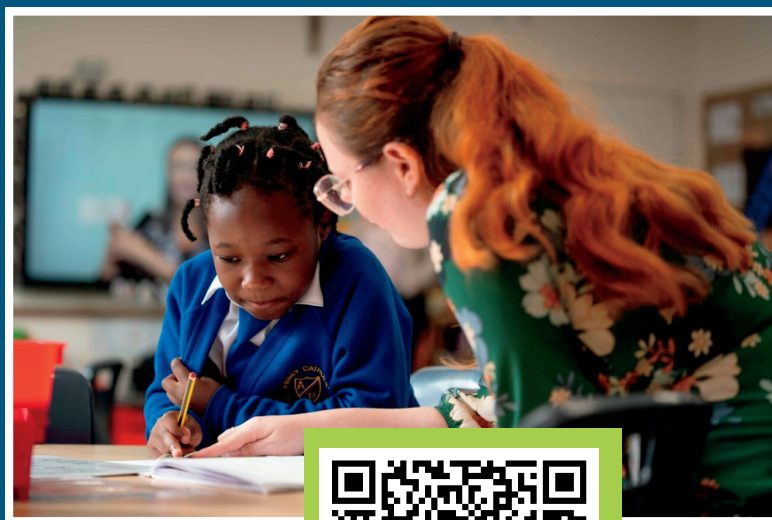

This Leading Safeguarding in Education PG Cert* will benefit both current and aspiring DSLs through a master's level programme of study that improves their ability to successfully administer the role, lead strategic whole school systems change and improve outcomes related to child welfare and safety in their settings.

Delivered in partnership with Safe4Schools, a specialist, UK-wide provider of safeguarding services to the education sector, you will study 2 modules; Contemporary Safeguarding Issues and The Designated Safeguarding Lead: Systems and Practice. The course is also a pathway to the MA Education in Safeguarding.

The course is delivered online with some on campus activities.

To find out more and apply, visit our website or scan the QR code.

*This course is subject to validation
